

Lonza

A Reference Guide for Primary Cells and Specialty Media

Lonza's primary cells are optimized for fast-track research findings: fully characterized and ready-to-use. Check this reference guide for your cells of interest.

[Search Primary Cells](#)

The reference guide for primary cells and specialty media helps you navigate the many possible combinations for your research use case:

- Human, or animal donors
- Fresh, or cryopreserved vials
- Normal, or diseased cells
- Recommended culture media

Search for your specific tissue of interest, or disease area, and explore the options to start building your biologically relevant research model.
